SAMITHI AND SANTHIRAM
GENERAL HOSPITAL**

Cleft Lip & Palate Reconstruction Programme:

In collaboration with the **Smile Network International Organization, USA**, **Santhiram Seva Samithi** and **Santhiram Hospital** facilitated numerous **free cleft lip and palate reconstructive surgeries** for children from economically disadvantaged families. Beyond corrective surgery, this humanitarian initiative restored confidence, improved speech, nutrition and facial function, while enabling children to overcome social stigma and lead healthier, happier and more socially inclusive lives. The programme exemplifies Dr. Midde Santhiramudu's belief that compassionate healthcare must restore not only physical well-being but also hope and human dignity.
