4. Rural Healthcare Outreach Programme: Service to community by conducting Health camps at villages:

Spearheaded one of India's largest sustained rural healthcare outreach programmes through **Santhiram Medical College** and **Santhiram Seva Samithi**, conducting more than **20,520 free multi-speciality medical camps** across the erstwhile united districts of **Kurnool, Kadapa, Anantapur, Chittoor and Prakasam**. These camps deployed multidisciplinary teams of specialist doctors, surgeons, physicians and healthcare professionals to remote villages, providing **free specialist consultations, diagnostic investigations, medicines, preventive healthcare education and personalised medical counselling**. By taking quality healthcare directly to the doorsteps of underserved communities, the initiative significantly improved early disease detection, preventive health awareness and timely access to specialist treatment for lakhs of rural citizens.

Through its extensive network of free medical camps and community outreach programmes, Dr. M. Santhiramudu transformed healthcare from a hospital-centric service into a community-based movement. Beyond providing free consultations, medicines and diagnostic services, these outreach initiatives enabled the early identification of patients suffering from serious and life-threatening illnesses, who were subsequently referred to Santhiram Hospital for free or subsidised treatment, as applicable. This seamless continuum of care ensured that economic hardship never prevented deserving patients from accessing quality medical services. Equally significant was the programme's role in promoting preventive healthcare and public health awareness. By educating rural communities on disease prevention, maternal and child health, hygiene and the importance of timely medical intervention, these initiatives gradually replaced superstition, misconceptions and reliance on unscientific practices with informed health-seeking behaviour. Through this institution-led model of community outreach, Dr. M. Santhiramudu not only facilitated treatment of illness but also empowered communities with knowledge, fostered trust in modern medicine and laid the foundation for healthier, more informed and self-reliant rural societies.

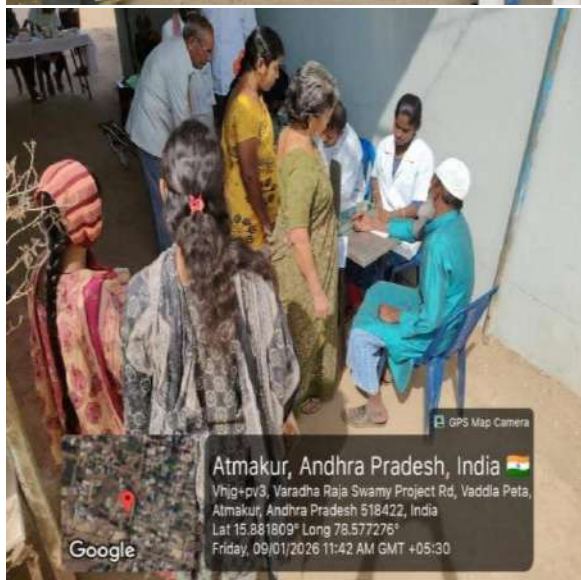

Community Eye Care & Blindness Prevention resulted in Record completion of more than 2,00,000 cataract Surgeries.

Spearheaded one of Andhra Pradesh's largest community eye-care and blindness prevention initiatives, resulting in the successful completion of **more than 200,000 cataract surgeries** for economically disadvantaged patients. This pioneering initiative restored the gift of sight to thousands of elderly and visually impaired individuals, substantially reducing avoidable blindness across the region while enabling beneficiaries to regain their independence, dignity, mobility and quality of life. The programme has become a benchmark in compassionate community ophthalmic care for rural population.
